Using the 4 Family Life Practices allows an opportunity for parents to implement research-based practices that supports family well-being and their child's school readiness. The following identifies those practices and progress made by families over the school year. As we know from analyzing child outcomes, the level of support a family need is individualized. We are reinforcing with staff and families the importance of these practices and the use them in concert with information shared and obtained during parent/teacher conferences, home visits and during advocate/parent contacts. HSEOC emphasizes the positive effects a supportive home learning environment has on a child's learning and school readiness.
